Folks, attached is the memo Ben put together last week re: methodology for spatial delineation of riparian area using DEQ definitions of OHW and MHW, and bathy and topo data from LWG and the City, respectively.

There are also the two pdf map files that Ben developed and that you saw last week. They are too big to email so you'll need to download them from our ftp site. Using your web browser, go to the following link:

ftp://ftp.orr.noaa.gov/public/CPRD/PortlandHarbor/

One at a time, click on the files called ph_riparian_series.pdf and ph_riparian_ortho_series.pdf. They are big files (especially the ortho file), so they'll take a few minutes to open in Acrobat. Once they are opened, save them to your hard drive.

Note -- Matt McClincy has the files on a disk for those of you at DEQ. And I think Carrie has them on her laptop.
